

HIPAA Security Manual For Employers/Brokers The Fastest Way To Security Compliance

- **Complete**
- **Customizable**
- **Affordable**

“The templates make short work of documenting our compliance with the HIPAA Security Ruling.”

About Us: HIPAA Solutions Rx is a compliance specialist in HIPAA, helping organizations navigate HIPAA regulations and put them into practice.

The HIPAA Security Rule requires you to implement the necessary compliance infrastructure in your organization to comply with the three key safeguards included in the Rule:

- Administrative
- Physical
- Technical

Similar to our popular HIPAA Privacy QuickStart Manual already in use by thousands of employers and their brokers around the country, our HIPAA Security Manual includes a simple to follow step-by-step guide tailored to employers and brokers to establish this infrastructure, complete with the policies and procedures surrounding the protection of Protected Health Information (PHI) held in electronic form.

Flexible in design, the templates can be easily customized for each organization. Each chapter has To Do Lists that lead you every step of the way. Each policy or procedure presents a coherent description of the related Security standard and implementation specification.

- | | |
|------------------------|---|
| Complete | Easy to read and adapt to your organization. Developed by renowned Healthcare, HIPAA Regulations experts, IT & Network security experts and based on best practices defined by security industry leaders such as National Institute of Standards and Technology (NIST). |
| Template Format | A total of 23 policies, procedures, reports and logs which you can quickly modify for your organization. This is simply the best collection of template documents available. All written in MS Word, these documents will greatly simplify your compliance burden. |
| Well Organized | All information and references are well organized and easy to use. |
